

## SEPTIC SYSTEM & DRAIN TREATMENT

- Made In Canada
- Reduces Solids in Septic Tank!
- Cleans Tanks, Pipe Lines & Drains!
- Eliminates Odours!
- Contains No Toxic Chemicals.
- Environmentally Beneficial.
- Complete Bacteria & Enzyme Formula.
- Certified by Environment Canada.
- Recommended by Professionals
- **MANY** other uses!

If you have any questions about the use of EcoEthic products or would like to place an order, please call:

## THE SOLUTION TO POLLUTION IS EDUCATION

### The Waste Stream Has Changed...

How many of us know how our septic system works, or think we know? We expect our septic systems to handle whatever we put into them, a never ending deluge of waste, cleaners, soap, grease, papers and water, water, water.

As water use has changed over the years septic systems have been expected to process much greater volumes.

Increased use of antibacterial cleaners and the huge array of shampoos, laundry detergents, bleaches, paper products, etc. gives us an amazing opportunity to overburden and 'mess up' our septic systems!

#### Malfunctioning Septic Systems...

- ...cause tile fields to fail and pollute
- ...emit unpleasant odours
- ...require frequent pump-outs
- ...contaminate soil & groundwater

Today septic systems require a quality biological septic additive to operate efficiently and effectively. EcoEthic Septic Treatment will add the necessary bacteria and enzymes to help prevent system failure and malfunction.

EcoEthic Septic System Treatment is a complete blend of natural bacteria and enzymes which digest organic waste.

#### Reduces Solids Build-up

Bacteria & enzymes digest organic waste leaving only water, carbon dioxide and mineral ash. Solids are digested which reduces build-up!

#### Helps Keep Tile Fields Clean

EcoEthic digests solids in the septic tank so they are not likely to enter the tile field. The main cause of Tile Field failure is solids build-up in the lines. EcoEthic is used to restore plugged Tile Fields, without digging!

#### Eliminates Odours

EcoEthic eliminates odour problems by digesting the odorous waste. Digested waste has no odour! No more stink around 'that side' of the house or cottage.
